Alcohol Ink

Alcohol ink is fun to play with and it is a super colour for all non porous surfaces. The colours are all beautifully blending together and the diluent helps to create shades and deep effects.

You can use it in Mixed Media, Scrapbooking and Painting.

You can just pour it and let it flow or dab it with a sponge or paint it with a thin brush to create beautiful flowers or abstract motifs.

The new acetates, printed, plain and die cut, are the best support to create album's pages or embellishments. It works very well with the Crystal resin, the Mixed Media Paste, the Arctic Pastes like Snow and Ice.

Plexiglass is perfect, Christmas balls can be painted with Alcohol inks and can be enriched with 3d embellishments created with the resin. We show you also some other items that go well together: empty spray bottles.

The **Diluent** is transparent, it's function is to blend the Alcohol Ink colours.

You can also use it to remove, to clean and correct the stains.

You can just pour it creating drops effects or use it with a brush, a sponge or with a spray for more overall effects.

You Can Use It On:

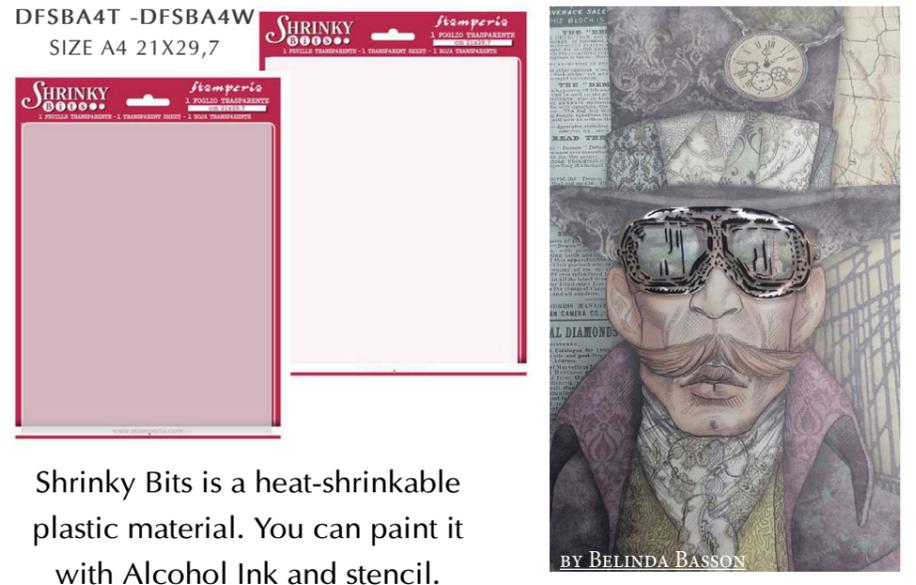

ACETATE

Acetate is the ideal material to enrich SCRAPBOOKING and Mixed Media projects. Using a sponge or just pouring the Alcohol Ink on it you can create beautiful effects. To better blend the colours you can use the Diluent.

SHRINKY BITS

Shrinky Bits is a heat-shrinkable plastic material. You can paint it with Alcohol Ink and stencil.

CANVAS & STONE PAPER

Canvas is a porous surface, before using the Alcohol ink spread a layer of Mixed Media Glue or any Paste like Gesso, Modelling Paste or Cream Paste.

You Can Use It On:

GLASS & PLEXIGLASS

To create a see through effect dab the Alcohol Ink with a sponge. It is also possible to apply resin decorations made with Crystal Resin on Moulds

CERAMIC

Alcohol Ink can be mixed with any Paste, better if very glossy like Glossy Gel or Ice Effect Paste.

CRYSTAL RESIN

When you pour the Resin in the mould you can add few drops of Alcohol Ink. It takes overnight to dry. To obtain a flexible decoration you need to use the A5 mini moulds.

CERAMIC POWDER

Ceramics is an ideal surface to decorate with Alcohol inks. Painting or sponging, the colour will be permanent. To get a metallic effect add the porporina Ceramic Powder

How To Decorate The Moulds:

You Can Use It With:

PORPORINA

DP01B
GOLD

DP02B
SILVER

DP03B
COPPER

PROJECTS BY DONATELLA RUSSO

Porporina is an extremely light metallic powder that you can mix with Alcohol Ink to obtain a covering, metallic paint. It is so light that it will rest on the surface of the paste or Resin creating a beautiful marble effect.
